SUMMARY

Backend developer with an engineering degree in Computer Science (2025). Since graduating I have worked as a freelancer, building and maintaining production APIs for three clients in Node.js, NestJS and Spring Boot. Most of my work involves payments, notifications and multi-tenant apps. Looking for a remote backend role.

SKILLS

Languages: TypeScript, JavaScript, Java, SQL, Dart
Backend: Node.js, NestJS, Express, Spring Boot, REST APIs, WebSocket, Socket.IO, Swagger
Databases: MongoDB, PostgreSQL, MySQL, Redis, Sequelize, JPA/Hibernate, Flyway
DevOps: Docker, Kubernetes, Helm, GitLab CI/CD, Git, Linux
Services: Stripe, Firebase (FCM), Twilio, WhatsApp Business API, Apple Wallet, Google Wallet

EXPERIENCE

Backend Developer | VClub by Vlynk (Freelance, Remote) | Jul 2026 – Present
Loyalty card platform for shops (points, stamps, cashback).

- Built the backend with NestJS, TypeScript and MongoDB: about 25 modules and 150 endpoints.
- Added Apple Wallet and Google Wallet loyalty cards that update after every in-store scan.
- Set up Stripe subscriptions, plan limits and webhooks to keep billing status in sync.
- Built marketing campaigns by email, SMS (Twilio) and WhatsApp.
- Added Google and Apple sign-in, staff roles, audit logs and FR/EN/AR translations.

Full Stack Developer | STE SMASS – v2 (Freelance, Remote) | Jun 2026 – Jul 2026
Second version of the inspection platform below.

- Turned the Node.js backend into a multi-company SaaS with roles and permissions, and migrated the existing data.
- Added Excel import, push notifications (FCM) and daily reminder jobs.
- Built the Flutter mobile app for the platform (22 modules, about 38k lines of Dart).

Backend Developer | Lamygo (Freelance, Remote) | Jan 2026 – May 2026
Parcel delivery and carpooling app.

- Worked on the Java Spring Boot backend (PostgreSQL, Redis): offers, price negotiation, promo codes and referrals.
- Integrated Stripe payments and handled webhooks safely so no payment is processed twice.
- Built push notifications with FCM (with limits so users don't get spammed) and translated the API into 5 languages.
- Wrote the Helm charts used to deploy the backend on Kubernetes.

Backend Developer | STE SMASS – v1 (Freelance, Remote) | Aug 2025 – Dec 2025
Web platform for a company that inspects oil, chemical and gas cargo on ships.

- Built the backend from scratch with Node.js, Express and MySQL (120+ endpoints, Swagger docs).
- Built invoicing in USD and EUR with VAT, inspector payments and profit reports.
- Generated bank transfer forms as PDF and automated emails to inspectors.

INTERNSHIPS

Final Year Project | TunisMove | Jan 2025 – Jun 2025
Flutter car rental app billed per trip, with damage detection (TFLite), ID card scanning (OCR), Stripe and Supabase.

Mobile Developer Intern | Linguify | Jun 2024 – Aug 2024
Flutter and Firebase app for language exchange, with user matching and spelling correction.

Full Stack Developer Intern | Africa Management Services | Feb 2022 – Jun 2022
Web app that replaced a manual ISO audit process (Node.js, React, MySQL).

EDUCATION

Engineering Degree in Computer Science | EPI Digital School, Sousse | 2023 – 2025
Master's in Cloud Computing (first year) | ISET Sousse | 2022 – 2023
Bachelor's in Multimedia and Web Development | ISET Sousse | 2019 – 2022

CERTIFICATIONS & LANGUAGES

Microsoft Certified: Azure Fundamentals (AZ-900), 2024
Arabic (native), French (professional), English (professional)
