SUMMARY

Flutter developer with an engineering degree in Computer Science (2025). I build mobile apps and the APIs behind them. My latest app has about 38k lines of Dart, works offline and talks to a Node.js backend that I also built. Looking for a remote Flutter or mobile full stack role.

SKILLS

Mobile: Flutter, Dart, Riverpod, Dio, Retrofit, Freezed, go_router, Clean Architecture
Firebase: Cloud Messaging (FCM), Authentication, Firestore
App features: offline mode, push notifications, PDF and Excel export, charts, maps, TFLite, OCR
Backend: Node.js, NestJS, Express, Spring Boot, REST APIs, Socket.IO
Databases: MySQL, PostgreSQL, MongoDB, Supabase
Tools: Git, GitLab CI/CD, Docker, Figma, Postman

EXPERIENCE

Backend Developer | VClub by Vlynk (Freelance, Remote) | Jul 2026 – Present
Loyalty card platform for shops, with a customer app and a shop dashboard.

- Built the backend used by the mobile and web apps with NestJS and MongoDB (about 150 endpoints).
- Added Apple Wallet and Google Wallet cards, Google and Apple sign-in, and a forced update check for the app.
- Set up push notifications (FCM) that reach customers right after each purchase scan.

Flutter Developer | STE SMASS – v2 (Freelance, Remote) | Jun 2026 – Jul 2026
Mobile app for the ship inspection platform below.

- Built the Flutter app from scratch for Android and iOS: 22 modules, about 38k lines of Dart.
- Organized the code by feature with Riverpod, Dio/Retrofit, Freezed and go_router.
- Added an offline mode: one tap downloads the user's data and the app keeps working without internet.
- Added push notifications (FCM), live updates with Socket.IO, charts, and PDF/Excel export on the phone.
- Updated the Node.js backend for multiple companies and added the endpoints the app needed.

Backend Developer | Lamygo (Freelance, Remote) | Jan 2026 – May 2026
Mobile app for parcel delivery and carpooling.

- Worked on the Java Spring Boot backend: offers, price negotiation, promo codes, referrals and Stripe payments.
- Built push notifications (FCM) and chat alerts over WebSocket, and translated the API into 5 languages.

Backend Developer | STE SMASS – v1 (Freelance, Remote) | Aug 2025 – Dec 2025
Web platform for a company that inspects oil, chemical and gas cargo on ships.

- Built the backend from scratch with Node.js, Express and MySQL (120+ endpoints).
- Built invoicing in USD and EUR, inspector payments and PDF bank transfer forms.

INTERNSHIPS

Final Year Project | TunisMove | Jan 2025 – Jun 2025
Flutter app for renting cars by the trip instead of by the day.

- Added a TFLite model that spots car damage in photos taken before and after each rental.
- Added ID card scanning (OCR), OpenStreetMap, Stripe payments and a Supabase backend.

Mobile Developer Intern | Linguify | Jun 2024 – Aug 2024
Flutter and Firebase app for language exchange, with user matching and spelling correction (DeepSeek API).

Full Stack Developer Intern | Africa Management Services | Feb 2022 – Jun 2022
Web app that replaced a manual ISO audit process (Node.js, React, MySQL).

EDUCATION

Engineering Degree in Computer Science | EPI Digital School, Sousse | 2023 – 2025
Master's in Cloud Computing (first year) | ISET Sousse | 2022 – 2023
Bachelor's in Multimedia and Web Development | ISET Sousse | 2019 – 2022

CERTIFICATIONS & LANGUAGES

Microsoft Certified: Azure Fundamentals (AZ-900), 2024
Arabic (native), French (professional), English (professional)
